Autore	Commissione europea : . Direzione generale Ambiente
Titolo	LIFE and resource efficiency : decoupling growth from resource use / European Commission, Environment Directorate-General
Pubbl/distr/stampa	Luxembourg : Publications office of the European Union, 2011
ISBN	978-92-79-19764-2
Descrizione fisica	69 : ill. ; 30
Collocazione	CDE 16.01 (XXXVII)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This publication aims to showcase how LIFE funding has generated a vast portfolio of know-how for a diverse range of beneficiaries and sectors: from LIFE Environment projects that have helped improve the resource efficiency of production processes to products that incorporate eco-design principles throughout their lifecycle. Other exemplary projects highlight approaches that can save water, reduce the negative impacts of transport, agriculture, fisheries and the food and beverage sector and lead to more energy-efficient buildings. The publication also shows how LIFE projects are helping to realise key EU policy goals such as better land use and planning, the development of green skills and Green Public Procurement. [Ed.]
